

Tunacky Kandere Presentation Report

Tunacky Kandere Presentation Report

Portfolio Details

- GitHub username: tunackykandere-lab - Repository: TunackyKanderePortfolio - Live portfolio: <https://tunackykandere-lab.github.io/TunackyKanderePortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on the landing experience, splash flow, dashboard structure, and how users move through the app.

Challenge and Solution

The main challenge was capturing mobile flow on a static page. The solution was a compact mobile case-study layout.

Learning Reflection

I learned how first screens, navigation, and information hierarchy shape the user experience.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
