

Tunacky Kandere Contribution Report

Tunacky Kandere Contribution Report

Student Details

- GitHub username: tunackykandere-lab - Repository: TunackyKanderePortfolio - Live portfolio: <https://tunackykandere-lab.github.io/TunackyKanderePortfolio/> - Project: SiteSpy

Contribution Area

My contribution focused on the landing experience, splash flow, dashboard structure, and how users move through the app.

Project Context

SiteSpy is a construction support app that keeps project records, helps with wall measurements and material estimation, and prepares information for later review.

Challenge and Solution

The main challenge was capturing mobile flow on a static page. The solution was a compact mobile case-study layout.

Learning Reflection

I learned how first screens, navigation, and information hierarchy shape the user experience.
